

FLOWDINE AI — LIVE RESTAURANT DIGITAL TWIN

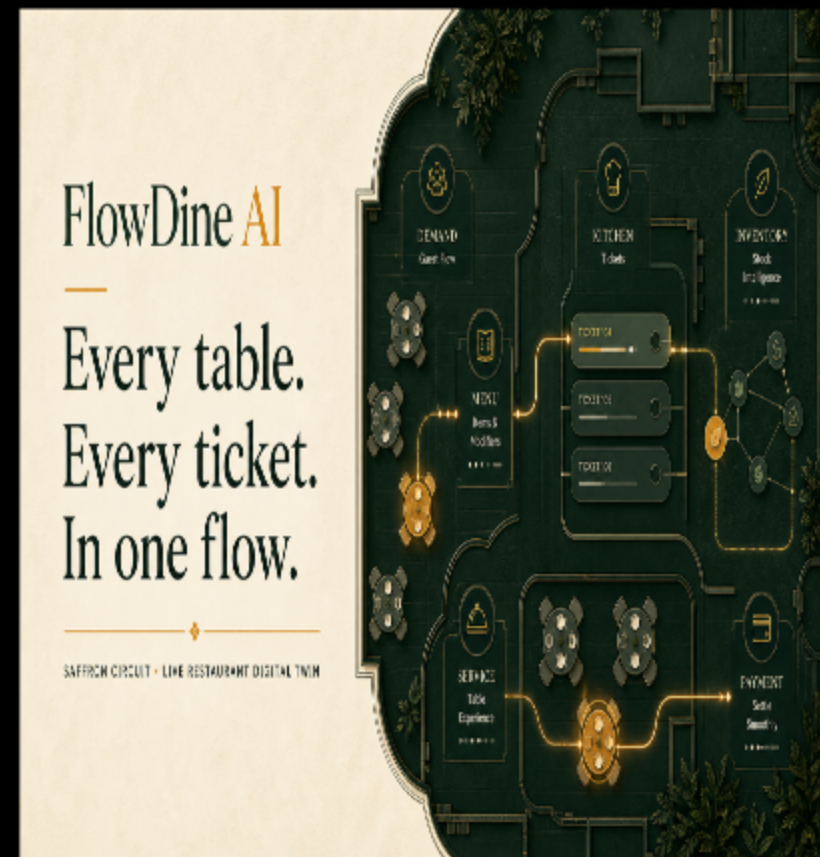

Team: FlowDine AI

Leader: [Add Your Name]

College: [Add College Name]

Year & Department: [Add Year & Department]

Project: Smart Restaurant Management System

CURRENT PROBLEM

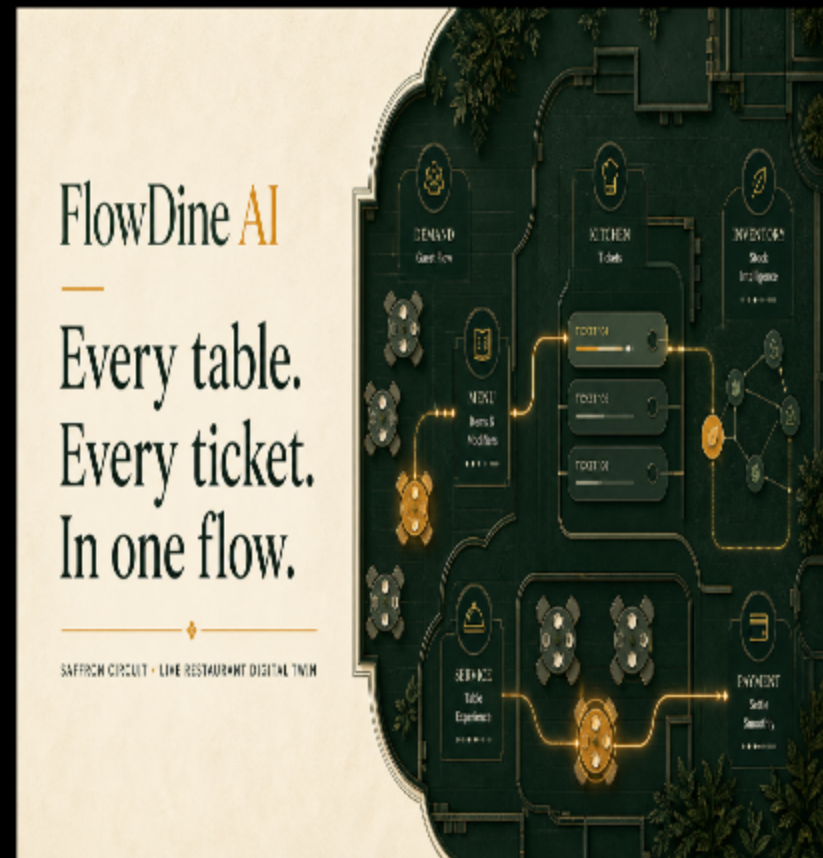

- Stockouts after choice
- Hidden table waits
- Delayed kitchen updates
- Manual order & stock
- No live manager view

Proposed Solution

- One live digital twin
- Recipe-aware availability
- Connected role workflows
- Queue, table & billing
- Forecasts + AI copilot

- Next.js + React + TS
- Server role permissions
- Recipe-order engine
- D1 state + audit log
- Gemini + local fallback

Use Cases & Impact

- Guests: truthful menu
- Kitchen: safer tickets
- Waiters: next action
- Managers: live control
- Fewer broken promises

Future Scope & Conclusion

- Email / Google auth
- Multi-tenant onboarding
- Realtime + payments
- Multi-location analytics
- Live demo today
