

FlowDine AI

Every table. Every ticket. In one flow.

Live Restaurant Digital Twin
for faster, smarter dining

Restaurants are serving guests with fragmented truth.

One service. Five blind spots.

The cost is not only time. It is broken trust at the table.

01 Dish availability
Guests discover stockouts after choosing.

02 Waiting time
Tables and orders move without a shared promise.

03 Communication
Kitchen, floor, and guest updates arrive late.

04 Manual operations
Orders, billing, and stock are reconciled by hand.

05 Manager visibility
Bottlenecks appear only after service suffers.

The missing product is not another ordering app.

It is one live operating layer that makes every role act from the same restaurant state.

MENU ≠ STOCK

KITCHEN ≠ FLOOR

MANAGER ≠ LIVE STATE

FlowDine replaces those gaps with one continuously synchronized truth.

REAL PRODUCT / LIVE DEPLOYMENT

One digital twin. Four focused experiences. One inventory truth.

Every action updates the shared operating state used by the next role.

One order moves the entire restaurant forward.

No re-entry. No manual stock toggle. No invisible handoff.

1 accepted order

updates 4 role views + the inventory ledger + the audit trail

Availability is calculated - never manually guessed.

The limiting recipe ingredient becomes the truthful menu promise.

Illustrative low-stock case

Ember Paneer Tikka

Paneer 720g ÷ 180g 4 portions

Greek yogurt 245ml ÷ 35ml 7 portions

MIN(4, 7)

ONLY 4 LEFT

At zero, ordering is blocked automatically.

The same truth, designed for the next decision.

LIVE JUDGE DEPLOYMENT

PRODUCTION SAAS HARDENING PATH

LIVE: ChatGPT Sites / Cloudflare • 4-second shared-state sync • strict TypeScript • tested domain logic

The full operating vision is live - with one honest identity gap.

Bronze	Modern role-based product experience Responsive guest, kitchen, waiter, and manager interfaces	COMPLETE
Silver	Digital restaurant workflows ♦ authentication Workflows complete; email/Google authentication is not runtime-connected	PARTIAL
Gold	Management dashboard and daily operations Orders, tables, inventory, revenue, service flow, and analytics	COMPLETE
Platinum	Intelligent operational decision support Forecasting, recommendations, stock risk, insights, and copilot	COMPLETE
Bonus	Live restaurant digital twin Recipe-linked availability, shared state, audit trail, and bill splitting	COMPLETE

Submission truth: demo role switching proves workflows; Supabase Auth is the remaining Silver requirement.

Let the restaurant think as one.

FlowDine AI reduces waiting, prevents unavailable-order frustration, improves staff coordination, and gives managers real-time control.
